

CBA also offers other services within the Environmental Remediation, Health & Safety fields.

Training:

The original roots of the company are in Environmental Health & Safety Training. CBA's founder, Mr. Bruce Brusco, first formed Enviro Haz-Tech, a training/safety consulting firm. Clientele ranged from emergency response personnel to chemical manufacturing plants. CBA specializes in developing customized courses for the Client's specific needs.

- Courses meet or exceed 29 CFR 1910
- Courses custom tailored to your facility
- Certified instructors use real experiences from Haz-Mat response teams
- Combine classroom and practical instruction

CBA has developed complete hazardous material training programs that meet or exceed the requirements of 29 CFR 1910. CBA courses are cost effective, well rounded programs that can be customized to meet the needs of the Client's facility. CBA's training staff consists of OSHA, State, and National Fire Academy certified instructors who draw from their experiences as Haz-Mat response team members. CBA's courses utilize a combination of traditional, audio, and visual classroom instruction with realistic, hands-on practical instruction. All students are tested and certified in both classroom and practical knowledge upon completion of the course.

Groundwater Remediation:

CBA also offers groundwater remediation services from design, implementation, to installation, operation and maintenance. CBA can offer standard packaged treatment systems designed to meet specific criteria or innovative in-situ technologies such as infiltration and flow-through trenches as well as slurry walls and impermeable barriers.
